

Clinical Study Synopsis

This Clinical Study Synopsis is provided for patients and healthcare professionals to increase the transparency of Bayer's clinical research. This document is not intended to replace the advice of a healthcare professional and should not be considered as a recommendation. Patients should always seek medical advice before making any decisions on their treatment. Healthcare Professionals should always refer to the specific labelling information approved for the patient's country or region. Data in this document or on the related website should not be considered as prescribing advice. The study listed may include approved and non-approved formulations or treatment regimens. Data may differ from published or presented data and are a reflection of the limited information provided here. The results from a single trial need to be considered in the context of the totality of the available clinical research results for a drug. The results from a single study may not reflect the overall results for a drug.

The study entitled "**A Double-Blind, Placebo-controlled Parallel Group, Phase II Dose-Ranging Study of Nebulized Amikacin Delivered via the Pulmonary Drug Delivery System (PDDS) in Ventilated Patients with Nosocomial Pneumonia Due to Gram Negative Organisms**" was registered by Aerogen Inc. under EudraCT **2005-000060-16** and conducted in collaboration with Bayer.

The study results were summarized in a peer review reviewed publication <http://dx.doi.org/10.1007%2Fs00134-011-2420-0>
