

## **Clinical Study Synopsis for Public Disclosure**

This clinical study synopsis is provided in line with **Boehringer Ingelheim's Policy on Transparency and Publication of Clinical Study Data**.

The synopsis - which is part of the clinical study report - had been prepared in accordance with best practice and applicable legal and regulatory requirements at the time of study completion.

The synopsis may include approved and non-approved uses, doses, formulations, treatment regimens and/or age groups; it has not necessarily been submitted to regulatory authorities.

A synopsis is not intended to provide a comprehensive analysis of all data currently available regarding a particular drug. More current information regarding a drug is available in the approved labeling information which may vary from country to country..

Additional information on this study and the drug concerned may be provided upon request based on **Boehringer Ingelheim's Policy on Transparency and Publication of Clinical Study Data**.

The synopsis is supplied for informational purposes only in the interests of scientific disclosure. It must not be used for any commercial purposes and must not be distributed, published, modified, reused, posted in any way, or used for any other purpose without the express written permission of Boehringer Ingelheim.

<b>Title of trial:</b>		A 12 week double-blind, randomised, placebo-controlled, modified dose-escalation trial to investigate safety, efficacy, and pharmacokinetics of BIRT 2584 XX tablets at doses of 100, 300 and 500 mg administered once daily in patients with moderate to severe psoriasis with a 12 week treatment extension for PASI 50 responders.								
<b>Coordinating Investigator:</b>		[REDACTED]								
<b>Trial sites:</b>		Multicentre study, [REDACTED]								
<b>Publication (reference):</b>		Data of this study have not been published								
<b>Clinical phase:</b>		IIa/b								
<b>Objectives:</b>		To investigate the safety, efficacy (proof of concept) and pharmacokinetics of BIRT 2584 XX tablets given orally at doses of 100, 300 and 500 mg q.d. compared to placebo tablets for the treatment of moderate to severe psoriasis.								
<b>Methodology:</b>		Randomised, double-blind, placebo-controlled study, parallel group

<b>Diagnosis and main criteria for inclusion:</b>		<p>- Adults with moderate to severe plaque-type psoriasis diagnosed at least 6 months before randomisation, minimum disease severity defined by body surface area (BSA) <math>\geq 10\%</math>, static Physician Global Assessment (sPGA) score of at least 3 and Psoriasis Area and Severity Index (PASI) score <math>\geq 10</math>.</p> <p>- Patients had to be candidates for systemic treatment or phototherapy</p>		
<b>Test product:</b>		BIRT 2584 XX		
<b>dose:</b>		100 mg, 300 mg and 500 mg q.d.		
<b>mode of admin.:</b>		per os, oral tablets		
<b>batch no.:</b>		PD-2675 (100 mg); PD-2676 (200 mg)		
<b>Reference therapy:</b>		placebo		
<b>dose:</b>		q.d.		
<b>mode of admin.:</b>		per os, oral tablets		
<b>batch no.:</b>		PD-2718 (placebo 100 mg); PD-2674 (placebo 200 mg)		
<b>Duration of treatment:</b>		12 to 24 weeks		
		Patients having a clinical response considered meaningful (defined by PASI <sub>50</sub> ) at the end of the 12-week treatment period with a satisfactory safety experience were eligible to enter a treatment extension phase of 12 weeks		
<b>Criteria for evaluation:</b>		<p><u>Primary efficacy endpoint:</u> Achievement of <math>\geq 75\%</math> reduction from baseline in PASI score (PASI<sub>75</sub>) at 12 weeks</p> <p><u>Secondary efficacy endpoints:</u></p> <p><u>Other PASI assessments:</u> Achievement of <math>\geq 75\%</math> reduction from baseline in PASI score (PASI<sub>75</sub>) at 24 weeks; achievement of <math>\geq 50\%</math> reduction from baseline in PASI score (PASI<sub>50</sub>) at 12 and 24 weeks; achievement of <math>\geq 90\%</math> reduction from baseline in PASI score (PASI<sub>90</sub>) at 12 and 24 weeks</p> <p>Time to sustained PASI<sub>50</sub> and sustained PASI<sub>75</sub> among PASI<sub>75</sub> achievers at 12 weeks; time to sustained PASI<sub>50</sub> among PASI<sub>50</sub> achievers any time during the study (within 24 weeks); time to sustained PASI<sub>50</sub> and sustained PASI<sub>75</sub> among all patients</p>

<b>Criteria for evaluation: (continued)</b>		<p>Absolute and percent changes from baseline in PASI scores; absolute and percent changes from baseline in PASI subscores (thickness, erythema, scaling)</p> <p><u>NPF Psoriasis Score “Static Physician Global Assessment (sPGA)”</u>: Achievement of sPGA clear or almost clear at Week 12 and 24; achievement of sPGA clear, almost clear or mild at Week 12 and 24; absolute change from baseline in sPGA at 12 and 24 weeks</p> <p><u>NPF Psoriasis Score Assessments (other than sPGA)</u>: Assessment of induration at two target lesions; Patient Global Assessment of Rank severity of psoriasis (PGAR); Body Surface Area (BSA) covered with disease (BSAD); Patient’s Assessment of Itch (PAI)</p> <p><u>Discontinuations of therapy due to lack of efficacy</u></p> <p><u>Relapse and rebound</u>: Incidence of relapse and rebound during treatment with study drug and 8 weeks follow-up period</p> <p><u>Dermatology Life Quality Index (DLQI)</u>: Change of DLQI score (quantitative) from baseline at 12 and 24 weeks; achievement of at least 5 points reduction on DLQI score from baseline at 12 and 24 weeks; combined achievement of at least 5 points reduction on DLQI score and PASI75 from baseline at 12 weeks</p> <p><u>Pain Visual Analog Scale for patients with psoriatic arthritis</u></p>		
<b>Efficacy / clinical pharmacology:</b>		Population pharmacokinetics		
<b>Safety:</b>		Incidence of adverse events, changes on physical examination and vital signs, changes in safety laboratory analyses and ECG, discontinuation of therapy due to an adverse event		
<b>Statistical methods:</b>		<p>Primary endpoint PASI<sub>75</sub> analysed with Fisher’s exact test. Analysis of covariance, Cochran Mantel-Haenszel test, Wilcoxon rank sum test and log rank test for secondary endpoints.</p> <p>For sPGA validation: correlations/concordance indices for reproducibility analyses, correlations and diagnostic / predictive indices for relationships with other measurements.</p>

#### **SUMMARY – CONCLUSIONS:**

##### **Efficacy / clinical pharmacology results:**

The trial was discontinued prematurely because of new preclinical safety findings of cardiac toxicity in mice; therefore, only limited efficacy data were obtained. PASI scores at the End of Treatment showed a slight excess of patients attaining PASI 75 and PASI 50 scores among patients in the BIRT 2584 XX 300 mg treatment group. Mean PASI scores at Weeks 8 and 12 showed trends towards lower scores in the BIRT 2584 XX 300 mg dose group. Static PGA also showed a weak trend towards improvement with increasing BIRT 2584 XX dose. However, in view of the limited number of patients completing 8 and 12 weeks of treatment, the present study cannot be considered an adequate evaluation of the efficacy of BIRT 2584 XX in the treatment of chronic plaque psoriasis.

##### **Safety results:**

BIRT 2584 XX appeared to be generally well tolerated in this study. Most observed adverse events (AEs) were mild to moderate in intensity. Diarrhea and pruritis were the only AEs that appeared to show a dose relationship to BIRT 2584 XX treatment. There were two serious adverse events (SAEs), neither of which was considered related to treatment. There were no notable abnormalities of safety laboratory tests, vital signs, physical examination, or ECG that were considered relevant to treatment. The post-treatment assessments, including the 1 year follow-up, did not show any evidence of cardiac toxicity.

##### **Conclusions:**

Overall, while weak trends in favour of BIRT 2584 XX treatment were observed among the secondary efficacy parameters, the study cannot be considered an adequate evaluation of the efficacy of BIRT 2584 XX in the treatment of chronic plaque psoriasis. BIRT 2584 XX appeared to be generally well tolerated in this study, and there was no evidence of cardiac toxicity.
