Utrecht, November 11th 2021.

Clinical Study Protocol

ACNS0423

EudraCT No 2006-005077-21

A Phase II Study of Concurrent Radiation and Temozolomide Followed by Temozolomide and Lomustine (CCNU) in the Treatment of Children with High Grade Glioma

This study was registered in the EudraCT database before the actual implementation of the trial in Dutch sites. The study was stopped by the international sponsor (COG) before any Dutch site had obtained EC's approval to include patients.
Therefore no report was created.
