

12 February 2019

EudraCT number: **2006-005399-42**

Protocol Title: **Improving symptoms of intermittent claudication in patients with erectile dysfunction and peripheral vascular disease: a pilot study assessing the benefit of daily dosing with tadalafil (Cialis) 10mg.**

Sponsor: **Guy's & St Thomas' NHS Foundation Trust**

With regards to the above clinical trial:-

This clinical trial was terminated early (21 May 2008) when the Chief Investigator left the employ of the Sponsor organisation and no alternative Investigator could be identified.

Four participants had completed the trial protocol with no reported Serious Adverse Events or significant adverse events, when the trial was terminated.

As such no Clinical Study Report will be produced or published due to lack of data.

Jackie Pullen

Director KHP-Clinical Trials Office on behalf of Guy's & St Thomas' NHS Foundation Trust
