

## Premature termination of a Clinical Trial

**Full title of the clinical Trial:**

**99Tc labeled Infliximab for evaluation of inflammatory activity in patients with inflammatory bowel disease (IBD)**

**EudraCT Number: 2007-000842-11**

**Sponsor: Medical University of Graz**

**Represented by (name): Univ.-Prof. Dr. Christoph Högenauer**

**Reason for premature termination of the clinical trial:**

The study was prematurely terminated because of lack of recruitment and since the coinvestigator has left the University hospital for private practice.

**Study results (if available):**

Three subjects were recruited (1 patient with ulcerative colitis, 2 patients with Crohns disease), no side effects were recorded from the application of 99Tc labeled Infliximab. No other conclusions can be drawn due to premature termination.

**Date and Signature of Sponsor representative:**

**08.07.2022**
