Dear Sir / Madam

Subj : Premature termination of study '3-hydroxy-3-methylglutaryl-coenzyme A reductase inhibitors: endothelial and endothelial progenitor cell function in men'

EudraCT Number: 2007-006234-34

Sponsor Number: CD07/8396

I am writing to inform you that we would like to terminate the above mentioned study as we have had difficulty recruiting subjects for it. Enclosed with this letter is a notification of end of a clinical trial. We would like to state that there are no SAE or SUSARs to report in relation to this study, there is currently no one on the trial drug, and there has not been anyone on the drug for over a year now. We wish to terminate the trial purely because we have experienced difficulty recruiting subjects.

I will be happy to provide you with any further information should you require it. In the meantime we would be grateful if you could kindly close this trial from your end.

Kind regards

Dr Vivek Baliga
