Results Report

Eudract No: 2008-000252-28

Full Title: A Multi-Centre Prospective Controlled Trial Comparing Calcineurin Inhibitor Monotherapy With Sirolimus Monotherapy in Hepatitis C Infected Patients with Hepatic Fibrosis Following Liver Transplantation – SHCVOLT-1

End Date: 17th July 2012

Results:

Due to logistical issues and changes in routine practice during its development and set-up this trial terminated prior to opening for recruitment. Zero (0) patients were recruited to the trial and therefore no results are available.
