Sleep disorders:
prof. dr. Wim Van Paesschen

The study "Simultaneous administration of lorazepam and levetiracetam in non-convulsive status epilepticus followed by IV valproate: a prospective, randomized, placebo-controlled, double-blind pilot trial" (EudractCT number: 2008-001098-13) was discontinued on 2009-04-03, since no patients were included one year after the start date.

Yours sincerely,

Prof. Dr. Wim Van Paesschen
