Not for prescription purposes

**EudraCT No. 2008-001749-25**

**An open label safety study of Fosamprenavir/ Ritonavir (FPV/RTV (Telzir)) administered to HIV/HCV co-infected patients over 96 weeks**

This study was submitted to authorities; however, due to delays on implementing this study (sponsorship difficulties), the site decided not to participate in the trial, therefore no report was created.

John S. Lambert, MD, PhD

Consultant in Infectious Diseases, Medicine and Sexual Health

Mater Misericordiae University Hospital, Rotunda Hospital, University College Dublin
