

EudraCT No.: 2008-003120-37

Protocol Code: UFK 2008-002

Title: EV(E)A Studie Estriol versus Estradiol – Eine prospektive, randomisierte Multizenter-Studie zur Evaluation der Wirkung einer lokalen Therapie auf urogenitale Beschwerden, Zytologie und Mammographiedichte

Principal investigator: Prof. Dr. med. Serban-Dan Costa

This study did not even begin because the responsible investigator left the clinic a short time after submission to CA and EC in 2008.

No site initiation took place and no patients were recruited.

Therefore there are no results to post.
