<b>End of Trial Date</b>	6 <sup>th</sup> June 2011 <b><i>This trial was terminated prematurely.</i></b>

### Summary:

This single-centre imaging trial opened to recruitment in June 2010 but recruitment to the study proved to be extremely difficult; no patients were enrolled and the trial was terminated early on 6<sup>th</sup> June 2011.

As no patients were recruited to the trial there are no results available to report. A Clinical Study Report was therefore not prepared for this trial; the MHRA were notified that a report would not be generated.
