CANCELLED BEFORE ACTIVE STATEMENT

EudraCT number	2009-014758-14
Study title	Does nebulised hypertonic (3%) saline reduce the duration of hospital admission in infants with bronchiolitis?
Date of statement	4 March 2020

As successor organisation to the sponsor of the study we confirm that this study was withdrawn with zero recruitment in 2010. As we do not have record of the exact date it was withdrawn and no completion date was recorded at the time we are entering a completion date of 31 December 2010.

Issued by Simon Connolly, Research Regulatory Compliance Manager, Chelsea and Westminster Hospital NHS Foundation Trust
