

Premature termination of a Clinical Trial

Full title of the clinical Trial:

Influence of perioperative administration of diclovenac-natrium/orfendadrincitrate on the recurrence rate of surgically treated spontaneous pneumothorax

EudraCT Number: 2009-016829-34

Sponsor: Medical University of Graz

Represented by:

Prof. Dr. Freyja Smolle-Jüttner

Reason for premature termination of the clinical trial:

Since 50 consecutive patients did not fulfill inclusion criteria (they had been given diclofenac-natrium/orfenadrincitrate prior to admission by other hospitals, pneumologists or family doctors) we decided to terminate the study.

Study results (if available): no

Date and Signature of Sponsor representative:

Graz, Feb 16th, 2023
