Title: A placebo controlled trial with Baclofen for the treatment of GERD patients with incomplete PPI response

EudraCT number: 2009-017351-96

Intern UZLeuven Snumber: S51996

This study was stopped prematurely because the catheter used for the ambulatory esophageal manometry broke and could not be repaired or replaced.

Last patient last visit (LPLV) took place on 24/04/2018.

Study results about the effect of baclofen on typical GERD symptoms are published in attached article.

Yours sincerely,

Prof. Dr. J. Tack
