

**Justification for not posting study results for 2010-019554-41**

The clinical trial referenced including asset TRU-016 is no longer owned by Emergent BioSolutions and results are not available. This asset was transferred to Aptevo as part of the company divestiture of Emergent Product Development Seattle LLC in 2016. Aptevo has been unresponsive to our outreach, so we do not have a contact to transfer ownership to. There is a [clinicaltrials.gov](https://clinicaltrials.gov/ct2/show/study/NCT01188681) entry for this trial (NCT01188681) with results posted, however the contact information for Scott Stromatt (study director) is outdated.
