Direttore Prof. Roberto Cantello  
**Centro Regionale Esperto SLA**  
Responsabile dr.ssa Letizia Mazzini

**Novara, 18/06/2019**

**A pilot, prospective, randomized, open, blinded end point, phase II study of tolerability and efficacy of Eperisone in Amyotrophic Lateral Sclerosis**

The project ended prematurely due to the difficulty in recruiting patients. This was due to the fact that in Italy the drug was available in pharmacies and therefore patients bought it and did not accept the possibility of taking the placebo.

The other main reason was the concomitant use of other antispastic drugs
