

Att. EMA

Vejle, Denmark, 16th of October, 2021

LATANO-2

“Pharmacological intervention on diabetic retinopathy with PGF”

EudraCT number: 2010-22433-29

As a primary investigator I have been attached to this project in the previously, and I am writing to you with the aim of justifying the missing results of this project.

The number of participants were fewer than we expected, and despite a prolonged period of time, there was not enough participants enrolled to give any useful conclusions. Consequently, the project was terminated without results.

Best regards from

Christina Moerup Joergensen
MD, PhD
