

EudraCT clinical trial results

EudraCT number	Sponsor code	Title
2010-023509-37	IIT2010	A prospective, randomized, single-blind, placebo-controlled, two-armed, phase IV study in patients with subclinical hypothyroidism treated over 52 weeks either with levothyroxine in adjusted dosing to a serum TSH target value of 1,0 mU/L +/- 0,5 mU/L or with placebo in the control group.

The trial was stopped when the physician who started to conduct it suddenly passed away.

No usable results were obtained.

Professor Dr med. Karl-Michael Derwahl
