

# Statement of premature termination of the trial

**EUDRACT-Nr.:** 2010-023575-25

**Full Titel of the CT:** Perioperative FOLFOXIRI and bevacizumab compared with postoperative FOLFOX in patients with resectable liver metastases from colorectal cancer (PERIMAX).

## **Trial was prematurely ended on 6<sup>th</sup> May 2013:**

Enrollment was terminated prematurely by the sponsor because of insufficient recruitment.

There was no patient included in the trial and there was no data evaluation.

End of Study was reported to German federal authorities and published on clinicaltrials.gov <https://clinicaltrials.gov/ct2/show/NCT01540435>
