

2010-024273-38

Leuven, 01 maart 2023

To whom it may concern

The study: "Supplemental Corticosteroids in Cirrhotic Hypotensive Patients with Suspicion of Sepsis"
(EudraCT: 2010-024273-38)
prematurely ended on 31/12/2020.

The perspective of persistently low inclusion rates has justified this decision.

Yours sincerely,

Prof. Dr. Alexander Wilmer
