**The Long-term Follow-up of Patients Who Participated in
the Multicenter Uveitis Steroid Treatment Trial (MUST Trial Follow-up Study)**

EudraCT 2011-001078-25

The Long-term Follow-up of Patients Who Participated in the Multicenter Uveitis Steroid Treatment Trial (MUST Trial Follow-up Study) was a prospective observational cohort study of patients who had participated in the MUST Trial. There were no treatments assigned in the MUST Follow-up Study. As such, the MUST Trial Follow-up Study, which was funded by the [U.S.] National Institutes of Health, did not require registration or results posting in the US registry, ClinicalTrials.gov, and should not have been characterized as a clinical trial for EudraCT.

A handwritten signature in black ink that reads "Janet Holbrook".

Janet Holbrook, PhD, MPH, MS

Professor of Epidemiology
MUST Coordinating Center Director
