

## Justification for Study Not Started

This document provides the justification for the premature interruption of the clinical trial identified by EudraCT number **2011-001573-10** which was approved but never initiated.

**Protocol title** : Optimization of broad-spectrum beta-lactam (ceftazidime, meropenem) and vancomycin dosing in oligo-anuric septic patients on chronic hemodialysis.

**Protocol code**: E2011HDinfection

**Reasons for study not started**: lack of patients & investigators.

No study activities were initiated, and as such, no results are available for submission. This document serves as confirmation of the non-initiation of the trial.
