EuraCT

Database, Clinical Trials

The following trial has for some time been recorded in the EudraCT database as
“prematurely ended” or “temporarily halted”:

| EudraCTnumber | Sponsor code | Title |
|----------------|-----------------|---|
| 2012-001049-42 | NA | MRI-perfusion and FLT- and FET-PET during bevacizumab monotherapy for patients with recurrent Glioblastoma Multiforme |

I am the sponsor and primary investigator of this trial, and by this letter I grant myself
designation to upload result (this letter) to the EudraCT Database.

I can confirm, that the trial is terminated, as it never started as ethical application was not
approved. I regret the missing update in the system

Sincerely

.....
Ulrik Lassen
