

## Premature termination of a Clinical Trial

**Full title of the clinical Trial:** Efficacy of induction of labor on term using a double balloon catheter compared to Dinoprostone vaginal-insert - a multicenter randomized controlled

trial. **EudraCT Number:** 2012-004880-36

**Sponsor:** Medical University of Graz

**Represented by (name):** Univ.-Prof. Dr.med.univ. Karl Tamussino

### Reason for premature termination of the clinical trial:

The double balloon catheter for induction of labour was introduced in routine induction of labour and the responsible trial doctor stopped working at our clinic.

**Study results (if available):** not applicable

**Date and Signature of Sponsor representative:**

11.09.24

**Universitätsklinik für  
Frauenheilkunde und Geburtshilfe**
