Dear MHRA

Trial title: RAMIPRIL: A double-blind, randomised controlled trial of percutaneous transluminal angioplasty (PTA) & Ramipril versus PTA & placebo in the management of intermittent claudication (IC).		
EudraCT no: 2012-005449-19	IRAS project ID: 113453	Sponsor R&D ref no: R1511
Participating site: Hull Royal Infirmary, Anlaby Road, Hull, HU3 2JZ		Principal investigator: Mr Augustine Smithies

This is to notify you that the above study terminated early with no sufficient data to analyse.

Unfortunately recruitment was much lower than expected as approximately 80% of patients were on an ACE Inhibitor (anticipated to be 20% when designing the study). Thus the trial would have required an extension both in time and funding. The decision was taken that this would not be feasible and the study was terminated.

Yours sincerely

James Illingworth
R&D Manager

**Remarkable people.
Extraordinary place.**
