

## Justification for Study Not Started

This document provides the justification for the premature interruption of the clinical trial identified by EudraCT number **2013-003349-41** which was approved but never initiated.

**Protocol title** : what are the optimal doses of cefuroxime for cirrhotic patients?

**Protocol code**: ERASMECFMI

**Reasons for study not started**: lack of patients and lack of investigators.

No study activities were initiated, and as such, no results are available for submission. This document serves as confirmation of the non-initiation of the trial.

**Prepared by:**
