

Medical University of Graz

Premature termination of a Clinical Trial

Full title of the clinical Trial: Genetic alterations in genes coding for transporters and metformin resistance

EudraCT Number: 2013-003938-32

Sponsor: Medical University of Graz

Represented by : Univ.-Prof. Dr.med.univ. Barbara Obermayer-Pietsch

**Reason for premature termination
of the clinical trial:**

For various reasons, it was not possible to recruit the planned number of participants within an adequate period of time.

Study results (if available):

Participants recruited between 2016 and 2018 were analyzed as "discovery cohort" in the study: "Identification of Novel Intronic SNPs in Transporter Genes Associated with Metformin Side Effects". The results were recently published in Genes (Genes (Basel). 2023 Aug 11;14(8):1609. doi: 10.3390/genes14081609.).
