Study Title: Pilot study of oral modafinil added to standard care in type II COPD

Chief Investigator: Dr Veronica Varney

Sponsor: Epsom and St Helier University Hospitals NHS Trust

Following an internal audit of the trial several GCP Breaches were identified and reported to the MHRA.

It was the decision of the Sponsor to terminate the study early.

Due to the GCP Breaches the integrity of the data means it cannot be verified therefore there will be no final report or summary of findings.
