Study Title: A Phase II Trial of Aflibercept Monotherapy With Early Dynamic Contrast Enhanced Ultrasound Monitoring in Chemorefractory Metastatic Colorectal Cancer

EUDRACT Number : 2014-002003-25

Sponsor: Barts & The London NHS Trust

CI: David Propper

On behalf of the sponsor, we confirm that although Sponsor approval was given for this study (April 2016) the cost of key trial procedures was significantly greater than originally budgeted, due to unavoidable and / or unexpected delays during study set – up. Thus the allocated funding was insufficient to cover the study and the funder withdrew further financial support.

No sites were initiated and no patients were recruited. End of study notification dated 15/02/2017 was sent to REC. Official EoT 6.02.2017

No results are therefore available.
