

Premature termination of a Clinical Trial

Full title of the clinical Trial: Latanoprost preserved versus unpreserved: effect on tear film thickness as measured with OCT

EudraCT Number: 2014-005468-14

Sponsor: Medical University of Vienna

Represented by (name): Assoc.Prof.Priv.Doiz.Dr. Gerhard Garhöfer

Reason for premature termination of the clinical trial:

The research question is no longer up-to-date, since many new intraocular pressure-lowering drugs have been approved in the meantime.

Study results (if available):
