

Dear,

We would like to inform you that, unfortunately, we are unable to upload the results for the clinical study *“Real time monitoring of blood propofol concentration of two different propofol 2% formulations”*.

Due to challenges encountered during the recruitment process, we were unable to complete enrollment and gather all the necessary data to proceed with the study. Despite our efforts, the recruitment targets were not met, which has prevented us from obtaining the full results for analysis.

On behalf of UZ Brussels.
Department of anesthesiology.
