

**EudraCT number**

2015-000654-38

**Title**

Secondary prophylaxis after hip fracture. An evaluation of two organizational models based on choice of treatment: a comparison of efficacy and applicability of hospital based treatment with Zoledronate versus primary care based treatment with Denosumab.

Oslo, 3 August 2021

Due to insufficient financial support, we were never able to start the trial. No participants were included.

Sincerely,

Christian Pollmann, MD
