

<b>EudraCT no.</b> 2015-001093-17
<b>Title of Study</b> Proof of concept study to assess downstream effects of using combined intranasal fluticasone propionate plus azelastine nasal spray on asthmatic inflammation in patients with persistent asthma and allergic rhinitis.
<b>Name of Sponsor</b> University of Dundee
The trial was terminated early as the company providing IMP was unable to supply further batches. The study did not meet its recruitment target and as a result it is under-powered and there cannot be a meaningful evaluation of the results.
<b>Report date</b> 16 <sup>th</sup> October 2020
