

Justification for Study Early Termination

This document provides the justification for the premature interruption of the clinical trial identified by EudraCT number 2015-001809-14 which was approved but never initiated.

Protocol title : Beta-Lactams (ceftazidime, piperacilline-tazobactam, meropenem) dosing scheme validation in septic hemodialysed patient

Protocol code: /

Reasons for study not started:

- lack of patients and investigators.

The study activities initiated do not provide sufficient results for submission. This document serves as confirmation of the early termination of the trial.
