

Kuopio University Hospital

Dexmedetomidine infusion in pain management during low back surgery

“DEXPAIN”

2015-002694-37

Sponsor’s protocol code number: 507A011

The trial has never been started

Based on the power analysis, the sample size of the trial was considered too large to be implemented at Kuopio University Hospital at the time of evaluation. The collection of data and enrolling of study subjects would have taken too long. So patients did NOT receive the study drug or placebo and the study was never started. There are no results to be reported from the trial.
