

Title: Quantification of ⁶⁸GaNOTA-Anti-HER2 VHH1 Uptake in metastasis of Breast carcinoma and cancer patients, and Assessment of Repeatability – Pilot study.

EudraCT number: 2016-002164-13

Protocol name: UZBRU_VHH1_3 (VUBAR)

Trial prematurely ended. Not all planned participants were included in the trial.

This trial consisted of three cohorts. The data from the first cohort have already been published by Dr. Gondry: *Gondry et al. Phase II Trial Assessing the Repeatability and Tumor Uptake of [⁶⁸Ga]Ga-HER2 Single-Domain Antibody PET/CT in Patients with Breast Carcinoma. J Nucl Med. 2024 Feb 1;65(2):178-184.*

The data from cohorts 2 and 3 have been incorporated into a paper that has now been submitted to JNM.

On behalf of UZ Brussels.
