Copenhagen 7, June 2022

Regarding: 2016-002367-34 (Beta 3 agonist treatment in heart failure (BEAT-HF II))

The trial has two steps; findings after one week and findings after 3 months.
The findings after one week have been published - and we are working on the 3 months data. We have been delayed for several reasons. As soon as these data are published they will be uploaded.

Kind regards
