

14.2.2 Secondary endpoints

Figure 14.2.2.5: Cumulative incidence of complete remission rate (including sCR) and death before complete remission rate (including sCR) from SCT - Full Analysis Population

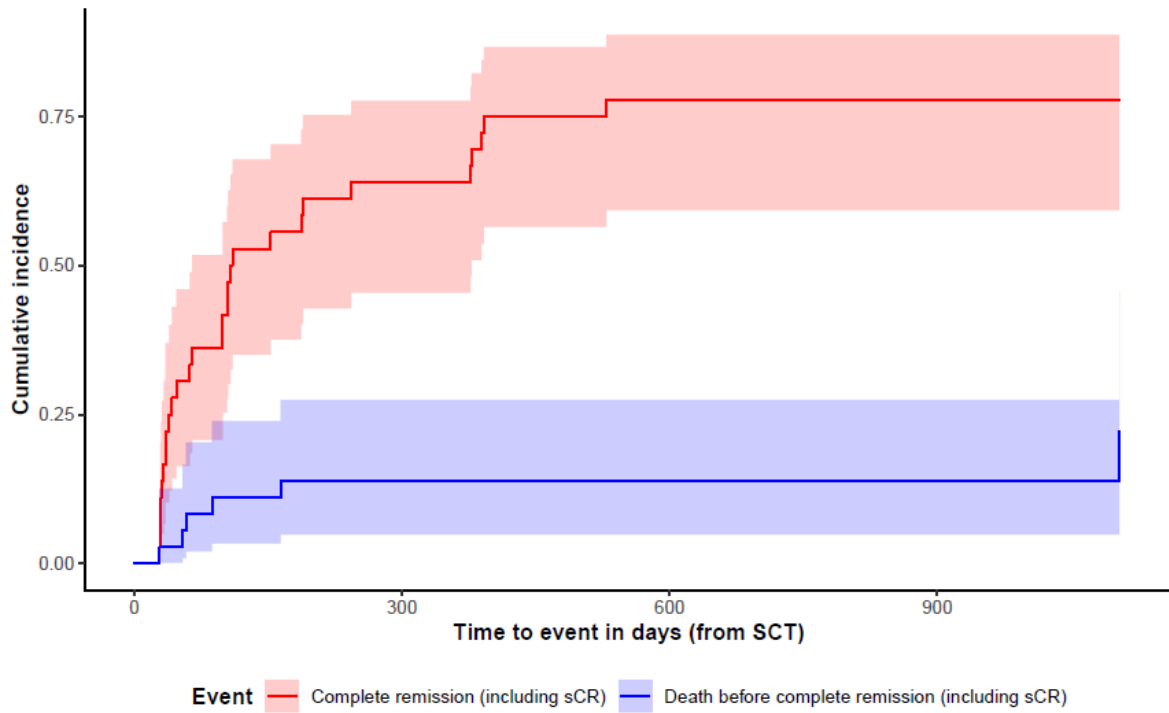

Table 14.2.2.5a: Cumulative incidence of complete remission rate (including sCR) and death before complete remission rate (including sCR) at 1 year and 2 years from SCT - Full Analysis Population

Time	Event	Cumulative incidence Function Estimate	Standard Error	95% Lower confidence interval	95% Upper confidence interval
1 year	Complete remission (including sCR)	0.639	0.083	0.454	0.775
	Death before complete remission (including sCR)	0.139	0.059	0.049	0.274
2 years	Complete remission (including sCR)	0.778	0.073	0.593	0.886
	Death before complete remission (including sCR)	0.139	0.059	0.049	0.274

sCR: stringent complete remission. All numerical values are rounded to 3 decimal places.
