

Pambio-Noranco, 12.08.2021

**Premature termination of a trial**

**Study n.:** 16I-Prg05

**Eudract n.:** 2016-002731-14

**Titolo dello studio:** *“Prospective, randomised, double-blind, placebo controlled, phase III clinical study assessing the efficacy of 25 mg natural progesterone administered subcutaneously in restoring the normal luteal phase in women with previous diagnosis of luteal phase deficiency.”*

The writer IBSA Institut Biochimique SA, as Sponsor, informs that the study was closed prematurely due to the non-enrollment of patients in the first six months of study and the retirement of the Principal Investigator and study coordinator (Prof Carlo Bulletti).

IBSA Institut Biochimique SA

A handwritten signature in blue ink, appearing to read "Barb Cometti", written in a cursive style.

Barbara Cometti, PhD  
Senior R&D Scientific Affairs Manager
