

Summary of data of *Effectiveness of different strengths of topical steroids: providing evidence for a better treatment strategy in children with atopic dermatitis in general practice.*

EudraCT number 2017-001525-40

A summary of the patients who were included (n=32) is provided below as we were unable to attain the calculated sample size (n=144).

Date of the end of the trial: 01-09-2021

	Total n=32 (100%)
Age, years	
Mean (SD)	5.5 (4.8)
Sex, female	13 (40.6%)
POEM Baseline (n=27)	
Mean (SD)	11.9 (5.7)
POEM Endpoint (n=26)	
Mean (SD)	5.7 (6.9)
EASI Baseline (n=32)	
Mean (SD)	3.7 (3.4)
EASI Endpoint (n=30)	
Mean (SD)	0.8 (0.8)
