

Dear,

We would like to inform you that, unfortunately, we are unable to upload the results for the clinical study "*The effects of nitrous oxide on human vision*"; EudraCT: 2018-000045-40.

Due to challenges encountered during the recruitment process, we were unable to complete enrollment and gather all the necessary data to proceed with the study. Despite our efforts, the recruitment targets were not met, which has prevented us from obtaining the full results for analysis.

On behalf of UZ Brussels.

Department of anesthesiology.
