Concerning:

The effect of Qutenza application in patients with post-operative neuropathic pain: A double-blind, randomized, controlled pilot study

Protocol id.: Qutenza-FM-20, version 7.1

EudraCT number: 2020-001022-57

The study has been terminated without any inclusion of patients due to the Following:

The initial study site was The Pain Clinic, Bispebjerg Hospital, 2400 NV Copenhagen, Denmark.

Due to retirement of the sponsor the study was moved to a second study site, without including patients, The multidisciplinary Pain Center, Næstved Hospital, 4700 Næstved, Denmark and the new sponsor was **Wojciech Zbigniew Pawlak**.

Shortly after the transfer to the new study site, the new sponsor left his position at the pain center and the study never got started and no patients was enrolled in the study.
