

Regarding: Premature ended trial

To whom it may concern,

Aim of project "COVID-19 PREVENTION" was to initiate prophylaxis of Covid-19 in nursing home residents following first Covid wave. The Danish Medicines Agency and Ethics Committee approved the trial. However, the Ministry of Health did not allow project initiation due to a new Danish law in which researchers were denied access to nursing homes during the pandemic. Therefore, the project was not feasible and terminated prior to inclusion of any patients.

yours sincerely
