

Study: EudraCT 2020-003579-16 – Multicenter, randomized, 52-week trial to determine the efficacy, adherence, safety, and tolerability of natural calcium and vitamin D3 and vitamin K2 supplementation, respectively, in postmenopausal women with newly diagnosed osteopenia]

Sponsor: Biomin, a.s.

Status: Study completed; results pending.

Reason for delay: Final data review (including query resolution and coding reconciliation) and statistical analysis are in progress. Quality control and internal approvals are pending completion.

Planned timeline: Full result-related information will be posted by the end of Q2 2026.
