Title: **Naloxegol for improving upper gastrointestinal symptoms and gastric emptying rate in patients with opioid induced constipation**

EudraCT number: 2020-003687-10

Intern UZ Leuven S-number: **S64451**

This study was prematurely stopped due to the withdrawal of the company for a grant, slow recruitment, the expiry of the study drug, and the short deadline to transfer the study to CTIS. There was one screening failure (2/03/2023) and no patients were randomized. There are no study results available.

Yours sincerely,

Prof. Dr. J. Tack
