**Study Title:** A Double-Blind, Randomized, Parallel-Group, Phase 2 Study to Investigate the Effect of RO7049665 on the Time to Relapse Following Steroid Tapering in Patients with Autoimmune Hepatitis

Study BP42698 was terminated by the Sponsor as a lack of efficacy was seen with RO7049665 in a study of ulcerative colitis. This reduces the likelihood that the drug is effective in autoimmune hepatitis. Only 2 participants were enrolled in this study. Based on the low enrolment number, study Results will not be submitted in order to protect and maintain participant privacy/confidentiality.
