Subject: Termination of the study Acetylcysteine + Paracetamol + Phenylephrine / Protocol No. CLK20001 / SAN-0657

We would like to inform you that Lek Pharmaceuticals d.d. has decided to terminate the clinical study *Efficacy and safety of the combination of acetylcysteine, paracetamol and phenylephrine for the treatment of common cold: a prospective, randomized, double-blind, controlled trial* (CLK2001/SAN-0657). This decision has been made due to internal business reasons. No patients were enrolled in any of the participating countries.

Date of the end of the trial: 30 August 2024

Igor Legen, Ph.D.

Global Head Clin Dev Complex Projects
