

Table 2. Association between CYP phenotypes and p-chlordiazepoxide

	Phenotype CYP3A4: normal CYP2C19: slow/normal	Phenotype CYP3A4: normal/fast CYP2C19: fast	Median difference [95% confidence interval]	P-value
P-chlordiazepoxide (µg/ml) at T _{inclusion}	12 (7.7-20)	8.6 (5.7-13)	2.9 [-4.3 - 10]	0.37
p-chlordiazepoxide (µg/ml) at T _{12H}	9.9 (6.1-14)	6.1 (5.3-8.2)	3.6 [-3.2-8.8]	0.22

T_{inclusion}: Time of inclusion in the study. *T_{12H}*: 12 hours after inclusion. Median (IQR). Mann Whitney test / Wilcoxon rank sum exact test.
