Clinical trial results:
A Double-Blind, Randomized, Multicenter, Placebo-controlled, In-Patient, Maximum 34 Day Study of Levetiracetam Oral Solution (20-50 mg/kg/day) as Adjunctive Treatment of Refractory Partial Onset Seizures in Pediatric Epileptic Subjects Ranging in Age from 1 Month to Less Than 4 Years of Age

Summary

EudraCT number	2004-000199-14
Trial protocol	CZ GB BE HU IT
Global end of trial date	26 January 2007

Results information

Result version number	v1 (current)
This version publication date	28 June 2016
First version publication date	22 July 2015

Trial information

Trial identification

Sponsor protocol code	N01009

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00175890
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	22 March 2007
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	26 January 2007
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the efficacy and safety of levetiracetam (LEV) used as adjunctive treatment in pediatric subjects age 1 month to less than 4 years with refractory partial onset seizures.

Protection of trial subjects:

Not applicable

Background therapy:

Not applicable

Evidence for comparator:

Not applicable

Actual start date of recruitment	15 October 2004
Long term follow-up planned	Yes
Long term follow-up rationale	Ethical reason
Long term follow-up duration	30 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 2
Country: Number of subjects enrolled	Brazil: 26
Country: Number of subjects enrolled	Czech Republic: 7
Country: Number of subjects enrolled	France: 6
Country: Number of subjects enrolled	Germany: 15
Country: Number of subjects enrolled	Hungary: 3
Country: Number of subjects enrolled	Italy: 5
Country: Number of subjects enrolled	Mexico: 6
Country: Number of subjects enrolled	Poland: 1
Country: Number of subjects enrolled	Romania: 4
Country: Number of subjects enrolled	Russian Federation: 7
Country: Number of subjects enrolled	United Kingdom: 1
Country: Number of subjects enrolled	United States: 33
Worldwide total number of subjects	116
EEA total number of subjects	44

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	61
Children (2-11 years)	55
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

This double-blind, randomized, multicenter, placebo-controlled, in-Patient study started recruiting in October 2004.

Pre-assignment

Screening details:

The Intent-to-treat (ITT) Population consisted of all randomized subjects who took at least one dose of study drug.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Matching oral solution to Levetiracetam b.i.d. (twice a day) for a maximum treatment duration of 20 days.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Oral solution
Routes of administration	Oral use

Dosage and administration details:

Placebo solution, which is indistinguishable from the Levetiracetam oral solution.

Arm title	Levetiracetam

Arm description:

10 % oral solution Levetiracetam b.i.d. (twice a day) for a maximum treatment duration of 20 days.

Arm type	Experimental
Investigational medicinal product name	Levetiracetam (LEV)
Investigational medicinal product code	LEV
Other name	Keppra
Pharmaceutical forms	Oral solution
Routes of administration	Oral use

Dosage and administration details:

Dosing was stratified by age. A dose of 20 mg/kg/day titrating to 40 mg/kg/day for children one month to less than six months old and a dose of 25 mg/kg/day titrating to 50 mg/kg/day for children 6 month to less than 4 years old, was used in this study. The total daily dose was administered b.i.d.

Number of subjects in period 1	Placebo	Levetiracetam
Started	56	60
Completed	53	58
Not completed	3	2
Consent withdrawn by subject	1	-
AE, non-serious non-fatal	-	2
SAE, non-fatal	1	-
Protocol deviation	1	-

Primary: Responder Rate for total partial onset seizures as computed from the 48-hour Evaluation video-EEG (post-baseline) and the 48-hour Selection video-EEG (baseline)

End point title	Responder Rate for total partial onset seizures as computed from the 48-hour Evaluation video-EEG (post-baseline) and the 48-hour Selection video-EEG (baseline)

End point description:

Responder Rate is defined as the number of subjects with a ≥ 50 % reduction from baseline in their Average Daily Frequency (ADF) for partial onset seizures divided by the total number of subjects.
If a subject had < 24 hours of usable Evaluation video-EEG time (including zero time available) and withdrawal from the study with reasons linked to lack or loss of efficacy, the subject was counted as a non-responder.

End point type	Primary

End point timeframe:

48-hours in Evaluation Period and 48-hours in Selection Period

End point values	Modified Intent-to-Treat (Placebo treated Subjects)	Modified Intent-to-Treat (LEV treated Subjects)

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events were collected from Selection Period (Day -8 to Day 0) until Post Treatment Follow-up (Day 24 ± 1).

Adverse event reporting additional description:

Adverse Events refer to the Intent-to-treat (ITT) Population, including all randomized subjects who took at least one dose of study drug.

Assessment type	Non-systematic

Dictionary used

Dictionary name	MedDRA
Dictionary version	9.0

Reporting groups

Reporting group title	Levetiracetam

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 April 2004	Amendment 1 dated 01-Apr-2004 modified the study design to incorporate neuropsychological testing, lengthened the down-titration period to decrease the risk of withdrawal seizures, lengthened the enrollment period and clarified the dosing scheme.
14 February 2005	Amendment 2 dated 14-Feb-2005 defined the policy regarding the enrollment of infants Born pre-term (before 37 weeks gestational age), defined the minimum weight of 4.0 kg and clarified the requirement for pre-screening of subjects by the UCB Clinical Research Physician (CRP).
14 June 2006	Amendment 3 dated 14-Jun-2006 added Argentina, Hungary, Poland, Romania and Russia, updated the background information to reflect FDA and European Commission approval of Keppra® for partial onset seizures in children ages four and above, and studies N159 and N157, defined the distinctive difference between electro-clinical seizure and electrographic seizures, and provided clarity to the description of cluster seizures.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
