Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 November 2007
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	13 May 2005
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

1. To describe the safety and tolerability profile of valganciclovir powder for oral solution and tablets in pediatric solid organ transplant recipients
2. To determine the pharmacokinetics of ganciclovir following oral administration of valganciclovir powder for oral solution and tablets in pediatric solid organ transplant recipients
3. To describe the incidence of cytomegalovirus (CMV) disease

Protection of trial subjects:

The conduct of this clinical study met all local legal and regulatory requirements. The study was conducted in accordance with the ethical principles that have their origin in the declaration of Helsinki and the ICH E6: Good Clinical Practice. Before entering the study, the informed consent form was read by and explained to all participants and/or their legally authorized representative. Participants signed informed consent form and could withdraw from the study at any time without any disadvantage and without having to provide a reason for this decision. Only investigators qualified by training and experience were selected as appropriate experts to investigate the study drug. Also, the independent Data Safety Monitoring Board ensured that participants were not put at undue risk.

Background therapy:

NA

Evidence for comparator:

Non-comparator study

Actual start date of recruitment	28 May 2004
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	3 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 18
Country: Number of subjects enrolled	Australia: 6
Country: Number of subjects enrolled	Canada: 9
Country: Number of subjects enrolled	Mexico: 9
Country: Number of subjects enrolled	Germany: 3
Country: Number of subjects enrolled	France: 6
Country: Number of subjects enrolled	Spain: 12
Worldwide total number of subjects	63
EEA total number of subjects	21

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	13
Children (2-11 years)	25
Adolescents (12-17 years)	25
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

A total of 63 participants were enrolled in this study conducted from 28 May 2004 to 13 May 2005. The study was conducted at 18 centers in 7 countries.

Pre-assignment

Screening details:

Participants were screened within 48 hours prior to transplant surgery (Day 1) and received valganciclovir from Day 1.

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Valganciclovir age group ≤ 2 years

Arm description:

Eligible participants aged ≤ 2 years received valganciclovir up to maximum of 900 milligrams (mg) once daily oral dose (solution or tablets) from the time of kidney transplantation for up to 100 days post-transplant. Dose was calculated using the algorithm ($7 \times$ body surface area [BSA] \times creatinine clearance [CrCLS]).

Arm type	Experimental
Investigational medicinal product name	Valganciclovir
Investigational medicinal product code	RO 107 9070
Other name	Valcyte
Pharmaceutical forms	Powder for oral solution
Routes of administration	Oral use

Dosage and administration details:

Valganciclovir powder was reconstituted with 91 millilitre (mL) of water to give a concentration of 50 mg/mL. Valganciclovir was also administered as a 450 mg film coated tablet if the projected dose was between 400 mg and 500 mg. If the projected dose was greater than 800 mg, two 450 mg tablets were taken. Valganciclovir powder for oral solution and/or tablets was administered to all the participants throughout 100 days dosing period.

Arm title	Valganciclovir age group >2 to < 12 years
------------------	---

Arm description:

Eligible participants aged >2 to < 12 years received valganciclovir up to maximum of 900 mg once daily oral dose (solution or tablets) from the time of kidney transplantation for up to 100 days post-transplant. Dose was calculated using the algorithm ($7 \times$ BSA \times CrCLS).

Arm type	Experimental
Investigational medicinal product name	Valganciclovir
Investigational medicinal product code	RO 107 9070
Other name	Valcyte
Pharmaceutical forms	Powder for oral solution
Routes of administration	Oral use

Dosage and administration details:

Valganciclovir powder was reconstituted with 91 mL of water to give a concentration of 50 mg/mL. Valganciclovir was also administered as a 450 mg film coated tablet if the projected dose was between 400 mg and 500 mg. If the projected dose was greater than 800 mg, two 450 mg tablets were taken. Valganciclovir powder for oral solution and/or tablets was administered to all the participants throughout 100 days dosing period.

Arm title	Valganciclovir age group ≥ 12 years
------------------	--

Arm description:

Eligible participants aged ≥ 12 years received valganciclovir up to maximum of 900 mg once daily oral dose (solution or tablets) from the time of kidney transplantation for up to 100 days post-transplant. Dose was calculated using the algorithm $(7 * BSA * CrCLs)$.

Arm type	Experimental
Investigational medicinal product name	Valganciclovir
Investigational medicinal product code	RO 107 9070
Other name	Valcyte
Pharmaceutical forms	Powder for oral solution
Routes of administration	Oral use

Dosage and administration details:

Valganciclovir powder was reconstituted with 91 mL of water to give a concentration of 50 mg/mL. Valganciclovir was also administered as a 450 mg film coated tablet if the projected dose was between 400 mg and 500 mg. If the projected dose was greater than 800 mg, two 450 mg tablets were taken. Valganciclovir powder for oral solution and/or tablets was administered to all the participants throughout 100 days dosing period.

Primary: Number of Participants with Any Adverse Events and Any Serious Adverse Events

End point title	Number of Participants with Any Adverse Events and Any Serious Adverse Events ^[3]
-----------------	--

End point description:

An AE was defined as any untoward medical occurrence in a participant or clinical investigation in participant administered a pharmaceutical product, which did not necessarily have to have a causal relationship with this treatment. A serious adverse event (SAE) is any experience or a significant hazard, that is fatal, life-threatening, requires in-patient hospitalization or prolongation of existing one, results in

persistent or significant disability, is a congenital anomaly, is medically significant or requires intervention to prevent one or other of the outcomes listed above. Safety population was used for the analysis.

End point type	Primary

Primary: Mean Area Under the Concentration-Time Curve From 0 to 24 Hours of Valganciclovir

End point title	Mean Area Under the Concentration-Time Curve From 0 to 24 Hours of Valganciclovir ^[4]
-----------------	--

End point description:

Area Under the Plasma Concentration-Time Curve (AUC) is a measure of the plasma concentration of the drug over time. The AUC 0-24hours is area under the plasma concentration-time curve from time zero through 24 hours after dosing. A compartmental model was used to measure the plasma concentrations of valganciclovir. The PK analysis population was used for the analysis. One participant was not analyzed for this outcome measure as the participant underwent both a kidney and liver transplant. Here n represents number of participant with specific transplant i.e., kidney, liver, and heart.

End point type	Primary
----------------	---------

End point timeframe:

Pre-dose; 1-3, 3-7, 7-12 hours post dose on any day between Day 7 to Day 14; and at Week 6, Week 10 and, Week 14

Secondary: Number of Participants with Cytomegalovirus Disease Over Time

End point title	Number of Participants with Cytomegalovirus Disease Over Time
-----------------	---

End point description:

Cytomegalovirus (CMV) disease is defined as syndrome or tissue invasive disease in which CMV virus was identified in blood, urine, biopsy or other suitable specimen, which could be in conjunction with one or more of the following events: a) CMV syndrome was defined as virus present in blood or other suitable specimen, plus fever, and any of the following: leukopenia, atypical lymphocytosis, thrombopenia or elevated hepatic transaminases (for non-liver recipients). b) The diagnosis of organ specific tissue invasive CMV disease was evidence of CMV in the tissue (CMV inclusion bodies or in situ detection of CMV antigen or DNA), plus signs/symptoms of organ dysfunction. Safety population was used for the analysis.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to Week 26

Adverse event reporting additional description:

Serious adverse events and non-serious adverse events are reported in safety analysis set, which consists of all participants who received at least one dose of study drug and had a safety assessment performed post baseline.

Reporting groups

Reporting group title	Valganciclovir age group <= 2 years
-----------------------	-------------------------------------

Reporting group description:

Participants aged <= 2 years received a once daily oral dose (solution or tablets) of valganciclovir from the time of kidney transplant for up to 100 days post-transplant. Dose [in milligrams (mg)] was calculated using the algorithm $[7 * \text{Body Surface Area} * \text{Creatinine Clearance}]$.

Reporting group title	Valganciclovir age group >2 to < 12 years
-----------------------	---

Reporting group description:

Participants aged >2 to < 12 years received a once daily oral dose (solution or tablets) of valganciclovir from the time of kidney transplant for up to 100 days post-transplant. Dose [in milligrams (mg)] was calculated using the algorithm $[7 * \text{Body Surface Area} * \text{Creatinine Clearance}]$.

Reporting group title	Valganciclovir age group >= 12 years
-----------------------	--------------------------------------

Reporting group description:

Participants aged >= 12 years received a once daily oral dose (solution or tablets) of valganciclovir from the time of kidney transplant for up to 100 days post-transplant. Dose [in milligrams (mg)] was calculated using the algorithm $[7 * \text{Body Surface Area} * \text{Creatinine Clearance}]$.

Serious adverse events	Valganciclovir age group <= 2 years	Valganciclovir age group >2 to < 12 years	Valganciclovir age group >= 12 years
Total subjects affected by serious adverse events			
subjects affected / exposed	13 / 17 (76.47%)	11 / 21 (52.38%)	11 / 25 (44.00%)
number of deaths (all causes)	1	0	0
number of deaths resulting from adverse events	0	0	0
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Plasmablastic lymphoma			
subjects affected / exposed	0 / 17 (0.00%)	1 / 21 (4.76%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 0	0 / 1	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Vascular disorders			
Haematoma			

subjects affected / exposed	0 / 17 (0.00%)	1 / 21 (4.76%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 0	0 / 1	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Lymphocele			
subjects affected / exposed	0 / 17 (0.00%)	0 / 21 (0.00%)	1 / 25 (4.00%)
occurrences causally related to treatment / all	0 / 0	0 / 0	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Surgical and medical procedures			
Gastrostomy tube insertion			
subjects affected / exposed	0 / 17 (0.00%)	1 / 21 (4.76%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 0	0 / 1	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
General disorders and administration site conditions			
Pyrexia			
subjects affected / exposed	1 / 17 (5.88%)	2 / 21 (9.52%)	1 / 25 (4.00%)
occurrences causally related to treatment / all	0 / 1	0 / 2	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0

occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Investigations			
Cytomegalovirus test positive			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	1 / 25 (4.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Transaminases increased			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	1 / 25 (4.00%)
occurrences causally related to treatment / all	1 / 1	0 / 0	1 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Blood creatinine increased			
subjects affected / exposed	0 / 17 (0.00%)	1 / 21 (4.76%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 0	0 / 2	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Cytomegalovirus antigen positive			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	1 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Hepatic enzyme increased			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Injury, poisoning and procedural complications			

Subdural haematoma			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Cardiac disorders			
Cardiac failure			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 1	0 / 0	0 / 0
Cardiac tamponade			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Nervous system disorders			
Cerebral infarction			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Leukoencephalopathy			
subjects affected / exposed	1 / 17 (5.88%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Blood and lymphatic system disorders			
Anaemia			
subjects affected / exposed	2 / 17 (11.76%)	0 / 21 (0.00%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	1 / 2	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Neutropenia			
subjects affected / exposed	0 / 17 (0.00%)	1 / 21 (4.76%)	1 / 25 (4.00%)
occurrences causally related to treatment / all	0 / 0	1 / 1	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Febrile neutropenia			

subjects affected / exposed	0 / 17 (0.00%)	1 / 21 (4.76%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 0	1 / 1	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Gastrointestinal disorders			
Intra–abdominal haemorrhage			
subjects affected / exposed	1 / 17 (5.88%)	2 / 21 (9.52%)	0 / 25 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 2	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Intestinal obstruction			
subjects affected / exposed	0 / 17 (0.00%)	1 / 21 (4.76%)	1 / 25 (4.00%)
occurrences causally related to treatment / all	0 / 0	0 / 1	0 / 1
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
